Geutebruck Nigeria Limited

Geutebrück Nigeria Limited is honored to be in Nigeria at this defining period of dynamic security challenges. We feel it is a duty to contribute to the peaceful co-existence and prosperity of all Nigerians and their guests by supporting government efforts to provide comprehensive security in Nigeria.

We are a high-tech security and logistic solutions company located at the heart of Germany. We know that security is confidential, our team all over the world display this from project conception, all through realization and handover.

Our technology includes:
- **Information management**: we integrate all your geographically distributed video management systems into one convenient, manageable overall system, intuitive to use, centralized or decentralized. SSL encryption is possible.
- **Geutebrück VCA- Video Content Analysis** can monitor e.g., movements in predefined areas or perform intelligent object detection. This is suitable for protecting vast areas. Alarm is activated if a critical event is detected. People, vehicles, and other objects are detected indoors and outdoors, regardless of weather conditions, night, or day. False alarms are ignored, thus limiting storage space.
- **ANPR (Number Plate Recognition)** can be captured with the VCA and may be used and matched against the database of approved or unauthorized vehicles.
- **Geutebrück G-Link Integration Server** makes it possible to connect a large number of third-party systems (e.g., fire alarm systems or access control systems). You can integrate several systems using only one product.
- **Geutebrück G-Health Monitoring Software** helps prevent failures in your system by consistently checking the functionality of your hardware components and alerts you in case of critical conditions, e.g., imminent hard disk failure or system malfunctions. It reports deviations real-time via e-mail or text message.
- **Geutebrück G-Core Integrations** connects you to e.g., cash register, radar, or access control systems etc.

Services
Geutebruck Nigeria Limited offers you the following:

- **Project conception up to implementation**-it is your project and you best know what your security challenges are Geutebruck recognises this. Your technical teams are involved from the start to the end
- **Patch management**-our system will remind your IT department when to update out-of-date programs. This will eliminate discrepancies between Microsoft patches with Geutebruck software and Geutebruck system.
- **Extended warranty**- we offer an extended warranty of three years with all of our products to make your life easy. Three years are not enough? We can extend the warranty to four or even five years with our warranty extension option.
- **Maintenance contracts**-Geutebruck Nigeria or partners will take care of the maintenance of your Geutebruck purchases. All maintenance servicing is individually tailored to each customer and is carried out at fixed intervals by trained Geutebrück specialists. Regular maintenance prevents malfunctions through errors or wear and tear and extends longevity and functionality.
